Production Process

A water-based soluble lubricant is used to assist with the roll forming process. These soluble lubricants are not considered hazardous when used as recommended by the manufacturer.

Handling & Storage

Products are supplied in pack and sub-pack quantities and should be handled in accordance with the recommendations contained in AS 1470 – Health and Safety at Work Principles and Practice.

Where mechanical lifting or moving equipment is required, trained and licensed operators are to be used.

Metal products should be stored in an environmentally-friendly area away from airborne contaminants such as acid and salt sprays.

Safety

It is our recommendation that protective clothing should be worn when handling metal products and that they should be checked regularly for damage.

People with sensitive skin conditions should seek medical advice before prolonged handling of metal products; hands should be washed before eating and for personal hygiene.

Non-fogging goggles should be worn when cutting metal sections.
